

LASS Environmental Policy Statement

LASS recognises potential impacts to the environment associated with operational events. In an effort to curtail these effects, our Charity is committed to implementing a policy that involves taking proactive measures to prevent pollution and conserve resources, while also maintaining quality services to our show visitors. We acknowledge the need for responsible and sustainable environmental management at all levels, and will strive to incorporate good environmental practices into all of our decisions and operations.

In pursuit of this venture, we will evaluate all LASS activities and will seek to improve any that adversely affect the environment. We will seek to minimize waste and emissions that result from any such activities, all while conserving resources and improving energy efficiency. To ensure this policy materialises, ideally, it is necessary to encourage a sense of environmental responsibility among all members, suppliers, volunteers and show visitors . We will comply with existing environmental legislation and will collaborate with authorities regarding environmental protection. We will also intend to discover novel methods of ameliorating the state of the environment. Performance will be monitored and reviewed regularly to fuel progress and constant improvement.

This policy will be revised periodically to ensure its
